LaDonna,

Sorry it took me so long to look at it. Today I have been swamped. I filled it what I could, I think you did an awesome job. We need to check with Kevin/Lisa and likely Pam Travis on some of the blanks call me tomorrow when you get in. We could talk about it after the Phase 1 report call tomorrow if you would like- It's 8:30 here and I am going back to the apartment of Brenda.

Subject: San Mateo Site Characterization Form

Hi Brenda.

Attached is what I have so far for the San Mateo Form. I added and mover stuff around. Please take a look at number 5. Michelle said that there are active and inactive mines. I didn't know whether to change that or not – what does active mean? The mine at San Mateo is not producing but is in a stand-by mode and Rio Algom is under reclamation. But no mines are productive. Also, double check the EJ stuff, I think I filled it out correctly but my pages didn't correspond with the instructions. Also, Jon had the highest levels of contaminants in one well but didn't report them all in pc/l, so look at the numbers. I am going to try to use one of the Weston maps to attach unless Michelle has already sent you one. Let me know if I need to add more information.

Thanks.
